CHAIRMAN STATEMENT

BACKGROUND

Wildlife at Risk (WAR) is a Non-Governmental Organization dedicated to protecting the biodiversity of Vietnam.

WAR was established in Delaware State, United States of America in October 2003, but is based in Ho Chi Minh City, Vietnam, and is active throughout the southern provinces of Vietnam.

Over a history of 18 years, WAR has experience of many aspects of conservation, including awareness, enforcement, rescue and rehabilitation, re-release, habitat monitoring, and breeding.

Our efforts to support biodiversity, and to enrich species particularly in degraded ecosystems, are implemented through twin initiatives of rehabilitating traded wildlife, and captive conservation breeding, both with the aim of eventual re-release.

VIETNAM

This large east Asian nation was once touted as a genuinely significant global hotspot for biodiversity, with a geography spanning different climactic zones, and rising from ocean-level deltas to jungle-covered mountain ranges. The Mekong river is a central feature. Sadly, the many years of conflict that led to national independence, and the developmental pressures involved in catering for a population that will soon cross 100 million, have presented major challenges for Vietnamese biodiversity. In the twenty-first century, as middle-income status is approached, Vietnam is juggling the balance between environment and economic growth. WAR seeks to catalyse conservation objectives.

CORE ACTIVITIES

Rescue and Re-release: WAR is often asked to receive illegally traded wildlife into its main station (see below), for rescue, quarantine, and subsequent re-release into appropriate habitats. WAR is one of, nowadays, a number of nation-wide rescue centers.

Conservation Breeding: Currently and for the foreseeable future, this is the principal activity of WAR. Given substantial and widespread destruction of habitats as well as significant illegal trade, WAR believes there is considerable long term value in building sustainable populations of certain vulnerable, endangered and critically endangered wildlife species, in accordance with established international protocols, notably those of Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES) and International Union for Conservation of Nature and Natural Resources (IUCN).

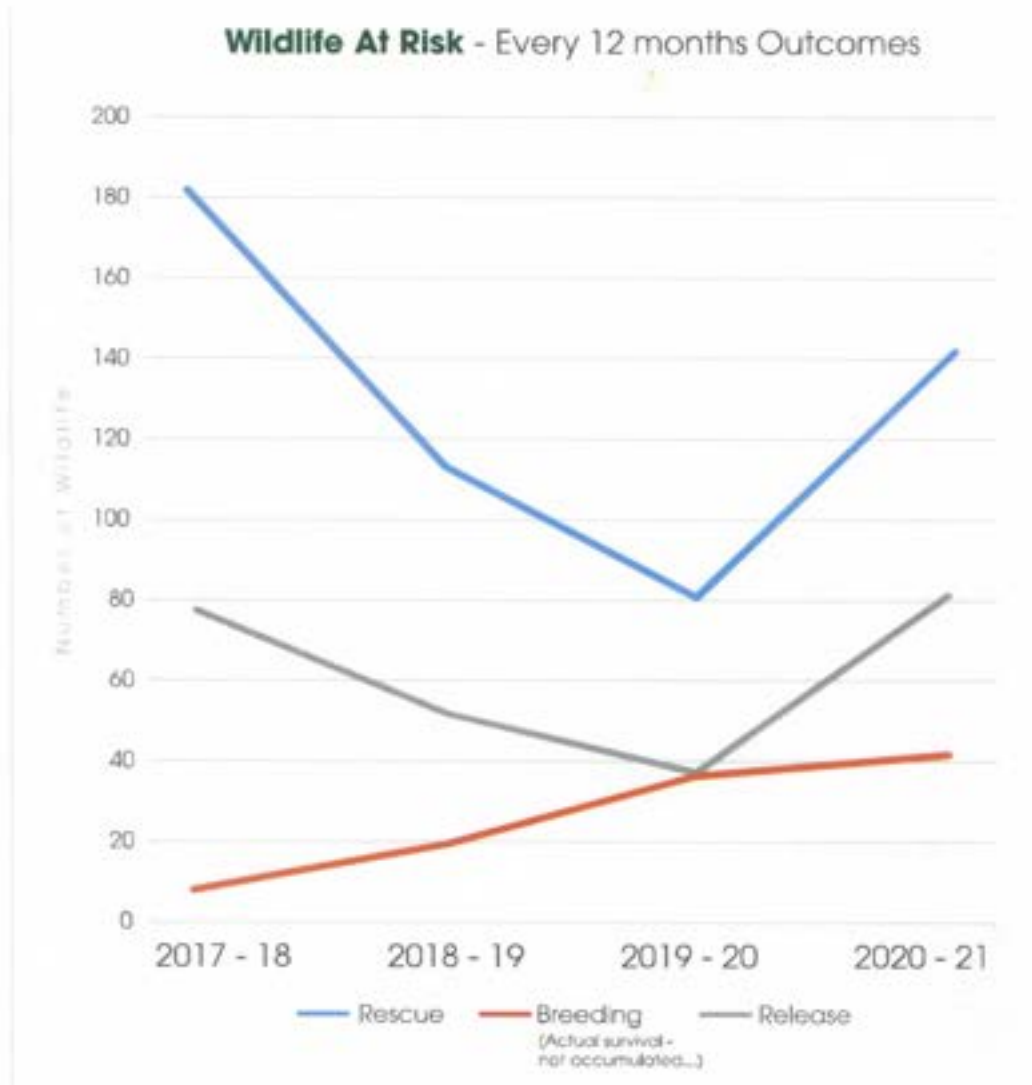

Awareness and Education: While recognizing that the welfare of wildlife is the principal priority, WAR is comfortable organizing awareness visits from local educational establishments; as well as longer internships for interested volunteers.

2020 - 2021 HIGHLIGHTS

Summary: The year ended 30 June 2021 marked four years of stability in WAR's repositioned legal and operational base, at Dau Tieng Wildlife Conservation Station, Binh Duong Province. Core physical infrastructure is in place, with initial populations of a total of 40 species, more than 15 of which are in potential breeding pairs. The last 12 months is remarkable with our successful breeding up to F2 generation of one endangered species, the Psychedelic Rock gecko and our first baby Pangolin at Dau Tieng Wildlife Conservation Station. WAR is now more closely concentrating on endangered species breeding.

The following chart shows every 12 months outcomes of WAR since 2017:

The Rescue and Release diagram reflects the core point that the more wildlife we receive, the more we are able to release. Breeding numbers reflect surviving individuals in any one year.

The Covid-19 Pandemic has of course prevented gatherings of people, and thus awareness activities. We have instead used the time in concentration, and preparation for happier times. A key initiative looking forward is a live streaming program from enclosures to the internet and social media.

Infrastructure: Adding to physical facilities of the last year, a boundary enclosure was constructed, with further wildlife enclosures at the Dau Tieng Wildlife Conservation Station. We anticipate in the coming year providing at least 10 more breeding enclosures for more focused on turtle breeding. Also continued planting of habitat to promote a suitable micro-climate at the Station.

The following species have been paired for breeding:

Mammals: small clawed otter, leopard cat, java pangolin; gibbon, loris, stump-tailed macaque.

Reptiles: cloud monitor; psychedelic rock gecko;

Turtle: giant pond turtle, soft-shell turtle, asian box turtle, yellow-headed temple turtle, pugin turtle, black marks turtle and elongated tortoise.

Among these, some preliminary success has been achieved this year with leopard cat, pangolin, psychedelic rock gecko, cloud monitor, soft-shell turtle, yellow-headed temple turtle, asian boxed turtle, giant pond turtle and elongated tortoise.

Human Resources: WAR maintains 10 staff, most working directly with the new wildlife conservation station. WAR benefits from generous support in time and expertise from international experts on conservation biodiversity and advice on appropriate wildlife enclosures design for long-term conservation purposes.

Expenditure: The overall budget for the year ended 30 June 2021 was USD236,597 of which USD164,412 was spent on WAR's enforcement activities in saving and releasing wildlife. USD3,595 was used on public awareness activities highlighting our commitment to Vietnam's wildlife and their habitats. The remaining budget was spent on operating cost.

WAR gratefully acknowledges donations from the following organization and other individuals:

Mr. Dominic Charles Scriven, OBE, Chairman and Founder,

Dragon Capital and Mr. Joshep Hoess,

The International Primate Protection Leagues (IPPL),

Cologne Zoo,

Douc Langur Foundation (DLF),

Greater Good Charities.

LOOKING AHEAD TO 2022

Predictions in the area of biodiversity are always rash. Clearly, though, global attention is increasingly aware of the frightful devastation being caused by human activity. Let us hope that in its very modest way, WAR is able to offer some slight positive impact.

Nguyen Vu Khoi

Wildlife At Risk (WAR), CEO

On behalf of

Dominic Scriven, OBE

Wildlife At Risk (WAR), Chairman and Founder

Wildlife At Risk (WAR) is dedicated to protecting the biodiversity of Vietnam by combating the illegal wildlife trade, raising environmental awareness and promoting the conservation Biodiversity.

INDEPENDENT AUDITORS' REPORT

To the Donors Wildlife At Risk

Opinion

We have audited the accompanying statement of receipts and payments of Wildlife At Risk for the year ended 30 June 2021 and notes, comprising a summary of significant accounting policies and other explanatory information ("the statement"), as set out on pages 8 to 13.

In our opinion, the accompanying statement of Wildlife At Risk for the year ended 30 June 2021 is prepared, in all material respects, in accordance with the accounting policies as described in Note 1 to the statement.

Basis for Opinion

We conducted our audit in accordance with International Standards on Auditing ("ISAs"). Our responsibilities under those standards are further described in the *Auditors' Responsibilities for the Audit of the statement* section of our report. We are independent of Wildlife At Risk in accordance with International Ethics Standards Board for Accountants Code of Ethics for professional accountants ("IESBA Code") together with the ethical requirements that are relevant to our audit of the statement in Vietnam, and we have fulfilled our other ethical responsibilities in accordance with these requirements and IESBA Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the statement of the current year. These matters were addressed in the context of our audit of the statement as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

We do not identify any key audit matters in our audit of the statement of Wildlife At Risk for the year ended 30 June 2021.

Emphasis of Matter – Basis of Accounting and Restriction on Distribution and Use

We draw attention to Note 1 to the statement, which describes the basis of accounting and the accounting policies adopted by Wildlife At Risk. The statement is prepared for the information of and use by the donors of Wildlife At Risk. As a result, the statement may not be suitable for another purpose. Our audit report is intended solely for Wildlife At Risk's donors and should not be used by or distributed to other parties. Our opinion is not modified in respect of this matter.

Responsibilities of Management and Those Charged with Governance for the statement

Management is responsible for the preparation of the statement in accordance with the accounting policies described in Note 1 to the statement, and for such internal control as management determines is necessary to enable the preparation of statement that is free from material misstatements, whether due to fraud or error.

In preparing the statement, management is responsible for assessing Wildlife At Risk's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to cease operations or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing Wildlife At Risk's financial reporting process.

Auditors' Responsibility for the Audit of the statement

Our objectives are to obtain reasonable assurance about whether the statement as a whole is free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of this statement.

As part of an audit in accordance with ISAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the statement, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of Wildlife At Risk's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.

30/12
NH
INH
C
T
1/11

- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on Wildlife At Risk's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditors' report to the related disclosures in the statement or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditors' report. However, future events or conditions may cause Wildlife At Risk to cease to continue as a going concern.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

The engagement partner on the audit resulting in this independent auditors' report is Pham Huy Cuong.

Wildlife At Risk

Notes to the statement of receipts and payments for the year ended 30 June 2021

These notes form an integral part of, and should be read in conjunction with the accompanying statement of receipts and payments.

1. Summary of significant accounting policies

The following significant accounting policies have been adopted by Wildlife At Risk in the preparation of this statement.

(a) Basis of preparation

The statement of receipts and payments, expressed in United States Dollars ("USD"), has been prepared on the cash receipts and disbursements basis. This is a basis of accounting that is designed to meet the requirements of Wildlife At Risk; it is not designed to produce a statement of receipts and payments that is compatible with International Financial Reporting Standards. On this basis, income is recognised when received rather than when earned and expenditure is recognised when paid rather than when incurred.

(b) Foreign currency transactions

Transactions in currencies other than USD during the year have been translated into USD at the rates approximating those ruling at the transaction dates.

(c) Specialised equipment

The cost of specialised equipment is recognised as expenditure upon acquisition.
